試題

Question Paper

本試題不可取走。

THIS QUESTION PAPER CANNOT BE TAKEN AWAY.

未得監考官同意，切勿翻閱試題，否則參賽者將有可能被取消資格。

DO NOT turn over this Question Paper without approval of the examiner.

Otherwise, contestant may be DISQUALIFIED.

All answers should be written on the ANSWER SHEET.

Section A – each question carries 4 marks

- 1) Find the value of $3 + 6 + 9 + \dots + 24 + 27 + 30 + 27 + 24 + \dots + 9 + 6 + 3$.
- 2) Find the smallest positive 2-digit factor of 2491.
- 3) Find the value of the expression below.

$$\frac{1}{\left(\frac{3}{\left(\frac{5}{8}\right)}\right)} \times 24$$

- 4) Find the unit digit of $1 \times 2 \times 3 \times 11 \times 12 \times 13 \times 21 \times 22 \times 23 \times 31 \times 32 \times 33 \times \dots \times 212$.
- 5) When a 3-digit number has a remainder of 2 when it is divided by either 4, 7 or 11. Find the largest possible value of the number.
- 6) Leo, David, Flora and Clark stand in a row for photo. If Flora and Clark must stand next to each other, how many different ways are there to take the photo?
- 7) How many rectangles are there in the figure below contains exactly 2 black dots?

請以最簡形式填寫答案。若計算結果是分數，請化至最簡，並確保為真分數或帶分數，或將計算結果寫成小數。答案可以根式表示，唯該根式必須是最簡形式。除特別註明外，毋需填寫單位。錯誤單位將不給予任何分數。

Write down the answer in the simplest form. If the calculation result is a fraction, please write down the answer as a proper or mixed fraction, decimal figure is also accepted. You may use square root to represent the answer which is in the simplest form.

Unless otherwise stated, no need to write down any unit. Marks will NOT be given for incorrect unit.

請將答案寫在 答題紙 上。

All answers should be written on the ANSWER SHEET.

- 8) In the figure below, the area of $\triangle BXC$ is 2016cm^2 and the length of both AD and BC are respectively 200cm and 300cm . Find the area of the trapezium $ABCD$.

~ End of section A ~

Section B – each question carries 5 marks

- 9) Among integers from 1 to 2016 (1 and 2016 inclusive), how many numbers are there cannot be divided by neither 7 nor 13?
- 10) Flora and Clark start swimming at the same time from the same side of a rectangular swimming pool. When they touches the edge of the other end of the swimming pool, they immediately swim back in the opposite direction. The speed of Flora is 3m/sec and that of Clark is 2m/s . It is also known that the length of the pool is 90m . What is the distance between their starting point and the point they first met?
- 11) Clark repeatedly wrote '83427' 60 times to form a 300-digit number. Find the remainder when the 300-digit number is divided by 6.
- 12) How many different 3-digit number can be formed by using 0, 1, 2, 6 and 7 without repeating any digits?
- 13) Find the value of $100^2 - 95^2 + 90^2 - 85^2 + \dots + 10^2 - 5^2$.
- 14) A plane is flying at a speed of 15km per hour to a destination. The plane has to reduce its speed on its return journey due to weather issues. If the average speed of the round flight is 12km per hour, find the speed of the plane on the return journey.

All answers should be written on the ANSWER SHEET.

15) Find the remainder when $1+2+3+\dots+2015+2016$ is divided by 16.

16) The figure below is formed by 2 squares. Find the area of the shaded region (in cm^2).

~ End of section B ~

Section C – each question carries 7 marks

17) Flora and Clark starts a journey at the same time from City A to City B. The speed of Flora is 8km faster than that of Clark per hour. Three hours later, Flora reaches City B and starts to return to City A. Flora meets Clark at 16km from City B. What is the distance between the two cities?

18) Find the value of A in the equation below.

$$2 + \frac{1}{2 + \frac{1}{1 + \frac{1}{1 + \frac{1}{1 + \frac{1}{A}}}}} = \frac{88}{37}$$

19) Clark and Flora has certain number of peanuts in the ratio of 3: 4. Then Flora gave 20 peanuts to Clark and the ratio between Clark and Flora becomes 7 : 6. How many peanuts does Clark have at the beginning?

20) There are a total of 100 coins, which are either \$1, \$2 or \$5. The value of the 100 coins is \$216. If the total value of the \$2 coins worth \$17 more than that of the \$1 coins, find the number of \$5 coins.

~ End of Paper ~
